Scan to link directly to a How-To video for Avery Light Fabric Transfers.

Avery Light Fabric Transfers are designed for white or light colored 100% cotton or poly/cotton blend fabrics. Visit [avery.com/transfers](https://avery.com/transfers) for easy-to-use design inspiration, templates, how-to videos, and a variety of tips and tricks. Follow the steps below to ensure great-looking results. Note that your results may vary based on a variety of factors, including fabric type, ironing equipment, temperatures, and wash methods.

### Dos & Don'ts of Fabric Transfers:

- **Don't** use a laser printer.
- **Don't** use steam in the iron.
- **Don't** use an ironing board, glass, granite, concrete, plastic or other heat sensitive or heat-retaining surfaces.
- **Do** iron on a heat resistant surface, such as a wooden table.
- **Do** allow the ironing surface to cool completely between transfers or use different areas of your workspace to avoid damage when creating multiple transfers at one time.
- **Do** follow washing instructions before wearing.

### Items Needed:

100% cotton or poly/cotton blend, white or light colored fabric

Waist-high smooth heat-resistant surface

Scissors or electric die-cutting machine

Household iron or heat press

Inkjet printer

Large cotton pillowcase

## 1. Design & Print

### Design

- Go to [avery.com/templates](https://avery.com/templates) and customize your design, using our free templates and online design tools.
- Design image as you want it to appear.

**Note: Image will be flipped in print preview.**

### Print

- Test print your design on plain paper to ensure the design looks accurate.
- Feed one fabric sheet at a time.

**FOR USE IN INKJET PRINTERS ONLY.**

## 2. Prep & Ironing

### Trim Material

- Cut out design leaving a narrow margin around image using scissors or electric die-cutting machine.
- Keep edges rounded (if possible) to avoid lifting during ironing and washing.

### Prep workspace

- Place a pillowcase down on a hard, heat-resistant surface. A wooden table is best. (Do not use an ironing board).
- Be sure iron does not have water in it and steam setting is off.
- Set iron to cotton setting and preheat for 5 minutes.
- Iron the pillowcase and garment to remove wrinkles.
- Use extreme caution when ironing. Avoid leaving iron face-down on the ironing surface for extended period of time, as it may result in injury or damage to the project or work surface.
- When creating multiple transfers at one time, allow the ironing surface to cool completely between transfers or use different areas of your workspace to avoid damage.

### Ironing

- Place transfer design down on the garment in the desired location.
- Iron transfer, applying firm pressure slowly from left to right and then from top to bottom.
- Be sure to iron over the edges.
- Turn off iron when finished.
- You may also use a heat press in place of an iron. Set temperature to 325-375°F, press for 30 seconds.

### Ironing Time:

Image Size	Ironing Time
Full sheet	3 minutes
1/2 sheet	1 ½ minutes
1/4 sheet	45 seconds

## 3. Finishing & Care

### Finish transfer

- After ironing, remove your garment from workspace and allow it to cool for 2-3 minutes.
- Smoothly and slowly peel backing paper away from corner to corner.
- If image begins to lift, re-iron image focusing on the lifting areas. Allow to cool once more before attempting to peel again.

### Care and Maintenance

- Wait 24 hours before washing garment.
- Wash garment before wearing:
  - Turn garment inside out and set machine to cold separately from other clothes.
  - Use color-safe detergent and wash separately from other clothes. Do not use bleach.
  - Remove promptly, colors may bleed if left wet too long.
  - Tumble dry on the lowest heat setting.
  - Do not iron directly on transferred image once it has been applied to the garment.
  - The transferred image is not intended to withstand stretching other than normal wear and tear.
